Dear Mr. Novotny:

RE: Review of Final Environmental Impact Statement for Allotment Management Planning in the Fall River West & Oglala Geographic Areas, Dawes & Sioux Counties, Nebraska and Fall River County, South Dakota

The U.S. Environmental Protection Agency has reviewed the Final Environmental Impact Statement for Allotment Management Planning in the Fall River West and Oglala Geographic Areas, Dawes and Sioux Counties, Nebraska and Fall River County, South Dakota. Our review is provided pursuant to the National Environmental Policy Act 42 U.S.C. 4231, Council on Environmental Quality regulations 40 C.F.R. Parts 1500-1508, and Section 309 of the Clean Air Act. The FEIS was assigned the CEQ number 20130331.

A concern that was addressed in EPA's comment letter on the Draft Environmental Impact Statement was that some environmental aspects that could potentially be affected by the implementation of the various alternatives were not considered in the Affected Environment and Environmental Consequences section. It appears this issue has been addressed in the FEIS, as that chapter has been amended to include these considerations. Thank you also for the clarification on whether Waters of the U.S. may be affected by the Allotment Management Planning.

EPA thanks you for addressing the observations and recommendations expressed in our DEIS comment letter. Thank you for the opportunity to provide comments regarding this project and your FEIS. If you have any questions or concerns, please contact me at 913-551-7565 or via email at tucker.amber@epa.gov.

Sincerely,

A handwritten signature in cursive script that reads "Amber Tucker".
